PEMKO SLIDING DOOR

Why Sliding Doors?

Add Style Where Space is Limited

Sliding doors aren't new; architects have always sought creative ways to increase usable space in facilities. Pemko offers an updated and aesthetically-pleasing twist on a classic idea that allows you to transform a simple doorway into a stylish focal point, while recovering the in-swing and out-swing space required by hinged doors.

The Designer's Choice

We've taken the functional benefit of the sliding door—maximizing floor and wall space—and created a complete solution that offers designers the maximum in versatility:

- Match the aesthetics of the facility with your choice of glass, wood, or hollow metal doors
- Pemko sliding door hardware systems can be hidden behind a fascia, concealed overhead, or exposed for upscale or rustic interiors
- Outfit the door with fashionable Rockwood pulls

Why Choose Pemko Sliding Door Hardware Systems

Each Pemko hardware system is designed, engineered and tested by sliding door specialists who understand the unique demands that the sliding motion places on hardware. Our sliding door hardware systems are manufactured to operate smoothly, be reliable and durable, as well as aesthetically pleasing.

FEATURED PRODUCTS:

Effortless Access with Sliding Door Automation

Our PemkoMatic™ (PSLIDE) low energy automatic door operating system offers versatile electromechanical solutions for manual sliding doors.

Designed to fit seamlessly with both pocket and sliding doors, it is ideal for new installations as well as retrofitting existing openings.

- User-friendly interface with three customizable modes for versatile door operation
- Adjustable open time ranging from 0 to 24 seconds
- Quiet operation allows for smooth and silent door movement, enhancing comfort and functionality in commercial spaces
- Durable construction tested to meet rigorous industry cycle standards

Conceals All Sliding Hardware

The Pemko Hide Slide™ (HIDESLIDE/48) completely and effectively conceals the hardware from view, whether your sliding barn door is in an open, closed, or moving position.

- For side wall track mounted applications only
- Features a six-way adjustable top roller that enables door to overcome common wall irregularities
- Nylon wheels with steel bearings allow door to slide smoothly and quietly

Designed For A Range of Doors

The **Pemko Through-Bolt Sliding Hardware Systems (TBS200A & TBS250A Series)** are a sliding solution for alternative door materials including metal, fiberglass, and aluminum. They are ideal for office, hospitality, retail, and entertainment applications.

- Through-bolts negate the need for a substantial top door rail
- ADA compliant; requires less than 5 lbs. of force to operate door
- Auto-centering apron equally distributes the weight of the door

Cascading Doors Create Movable Wall

The **Pemko Telescoping Hardware System (CAS200A)** creates a cascading wall of door panels that stack and glide into storage pockets, stack in cased openings or even side wall mount applications to stack against walls.

- Section off parts of a room
- Standard 2-door to 8-door systems accommodate most openings
- Ideal for hotel breakfast or other serving areas

Customer Favorite is Versatile and Reliable

The versatile **Pemko Sliding 200 Series (H200)** can be configured for a single door or bi-parting double door.

- Two mounting options available: side wall or overhead mount
- ADA compliant; requires less than 5 lbs. of force to operate door
- Ideal for offices, healthcare, or multi-family applications

The Ultimate Space Saver: Pocket Doors

With the **Pemko Pocket Frame Kit (PF28200A & SC-PF28200A)**, the door slides back into the wall freeing up door clearance and wall space.

- ADA compliant; requires less than 5 lbs. of force to operate door
- Best for installation in new spaces or buildings
- Ideal for maximizing space in commercial offices, multi-family or condominiums

Folding Doors for Closets or Doorways

The **Pemko Folding 100 Series System (HF2/100A & HF4/100A)** is suitable for closets and for separating a room within a room where space to store open doors is limited.

- Two or four doors up to 24" wide and 96" tall
- Overhead or side wall mounting
- Ideal for hotels, assisted care and residential

By-Pass Sliding Doors

The **Pemko By-Pass Track System (HBP200A)** allows one door to pass in front of the other on one track, allowing access through one side of the opening.

- Two mounting options available:
 - Standard overhead mounting
 - Optional brackets for sidewall mounting
- No space required for door swing
- Ideal for offices, hotels and residential
- ADA compliant; requires less than 5 lbs. of force to operate door

Exposed Sliding Hardware Adds a Decorative Touch

The **Pemko Stainless Steel Sliding Track Hardware System (Deco)** adds style to modern decor with multiple hanger designs including several with the unique **Cushion Stop** to prevent door from racking.

- Smooth quiet operation suitable for shared spaces; operation requires less than 5 lbs. of force and is ADA compliant
- Ideal for offices, hotel rooms and multi-family units
- Options for wood and glass doors

W60 Series

G60 Series

Flat Track for The Barn Door Style

The barn door style **Pemko Flat Track Sliding Door Hardware (BLD, DSG)** offers contemporary or rustic appeal. Choose the Builders Series for doors up to 240 lbs. and the robust Designer Series for doors up to 500 lbs.

- Builders Series: Two hanger options, choice of two finishes
- Designer Series: Two hanger options, choice of three finishes
- Ideal for offices, hotels, and high-end commercial applications
